

## Service Fees

---

<b>Cylinder Valves K model</b>	\$ 8.00 Labor Plus any parts
<b>Cylinder Y valves dual outlet</b>	\$ 12.00 Labor Plus any parts
<b>Manifold System w/Out center Isolator</b>	\$ 14.00 Labor Plus any parts
<b>Manifold System w/Center Isolator Valve</b>	\$ 18.00 Labor Plus any parts

**Cylinder Hydrostatic Testing & Inspection**      \$ 30.00 \*

Includes internal & external inspection of cylinder, hydrostatic pressure test to meet DOT, manufacturer and PSI specifications. Valve is removed inspected and serviced accordingly as needed and mounted with new neck and regulator to yoke connection O'ring cylinder is filled with air to working pressure and checked for leaks.

**Cylinder VIP**      \$ 15.00 \*

Service includes internal & external inspection of cylinder as per PSI specifications. Valve is removed inspected and serviced accordingly as needed and mounted with new neck and regulator to yoke connection O'ring cylinder is filled with air to working pressure and checked for leaks.

**Cylinder VIP Doubles**      \$ 45.00 \*

Service includes disassembly of cylinder bands, manifold system, internal & external inspection of cylinder as per PSI specifications. Valves are removed inspected and serviced accordingly as needed and mounted with new neck and regulator to yoke connection O'ring cylinders are filled with air to working pressure and checked for leaks.

**Cylinder Cleaning for Oxygen Service**      \$ 55.00 \*

Service includes internal cleaning of cylinder and valve with approved cleaner for Nitrox service, cylinder is then air dried with Nitrox compatible air, valve or manifold is serviced (valve and parts service fees apply) according to Oxygen service guidelines and assembled using Nitrox compatible service kit and lubrication.

**\*BCD Service**      \$ 28.00 \*

Service includes complete inspection of BC air cell for any leaks or damage, all straps and buckle assemblies, corrugated hose, over pressure valves, rapid exhaust valves if equipped, including cylinder retaining cam strap. Inflator is removed from BC, disassembled and cleaned using ultrasonic solution air dried inspected and assembled with new O'ings as needed mounted and complete BCD is pressure tested to meet specifications.

\*BCD equipped with Air-II or Alternate air sources required additional servicing and parts apply.

**Air-II or Alternate Air sources** \$ 21.00 \*

Service includes disassembly of air-source, cleaning with ultrasonic with approved solution air dried inspected and reassemble using service kit and approved lubricant. Mount on BCD air test, calibrate to manufacturer specifications and checked for leaks and proper function. QD coupler is also serviced.

**Regulator System, w/Standard First Stage w/Second Stage** \$ 45.00

**Regulator System, w/Balanced First Stage w/Second Stage** \$ 65.00

Complete regulator system is inspected and air tested prior to disassembly to determine function, condition and stability of regulator as complete system. Inter stage pressure, breathing resistance is tested and noted.

All hoses are inspected for leaks, cracks, corroded fitting, ruptures, delaminating, hose protector are recommended to customer is not installed on hose. Hoses are cleaned and fitted with new O'rings.

Regulator system is disassembled, cleaned with ultrasonic in approved solution air dried, inspected and assembled with new service kit, lubricated with approved lubricant, air test and calibrated on test bench with Magnehelic® device to manufacturer specifications and calibration is met. All accessories (console, octopus, BC hose etc) are mounted and tested. Service includes replacement of Air-Spool O'rings on console.

On systems equipped with diving computer consoles, battery service levels are verified and battery is replaced in accordance with the manufacturer's specifications for additional fee.
